Introduction to HaiCollect

Welcome to the most advanced tool available today for commercial credit managers to place collection claims and monitor outsourced collection activity!

HaiCollect allows you to place claims without generating additional paperwork- you can upload documents via scanner or from documents already imaged in your system as a part of the claims entry process.

The database also allows you to communicate with your HAI representative via e-mail from within the claim detail in the database. Report payments, provide information or ask a question and we'll respond immediately.

HaiCollect also allows you to check the status of our collection efforts, on-line in real time. All collection calls and documents are part of our database and available for your review from any location where you have Internet access at any time of the day or night.

Collection status reports are available on line and can be run based on your selected date range.

HaiCollect allows you to search our database for collection placements by other clients for accounts you may be dealing with. Our Debtor Search functionality will show you all claim activity we have had against specific debtors. For the protection of our clients, we will not provide the name of the referring company or other confidential information.

Contact us today to obtain your User ID and Password.

HaiCollect: Changing the way you think about collection agencies!
